- Final day of culture.
- Any additional fair to high-quality embryos will be biopsied and cryopreserved.
- Patient updated with status report.

Communication of results from the IVF Lab

Dallas IVF Embryology team will provide notifications on your IVF cycle via electronic reports released to your patient portal. On Days 1 and 6, you will receive a text message and an email notification that your status report is ready to view. If your treatment plan is for oocyte vitrification only, you will receive a report on day of retrieval (Day 0). To obtain this report, please login to your patient portal and navigate to "Documents" then click on "Retrieval Reports." Please feel free to contact Embryology with any questions or concerns.
